

4-1.3 DECISION NO. D-29

ENERGY MANAGEMENT PROGRAM

Issue:

Guidelines are needed to provide an overview of the Indian Health Service (IHS) energy management program (EMP) and to summarize other documents and standards, and to serve as a framework for conducting the energy program to include training, analyzing historical billing records and energy conservation opportunities (ECOs), conducting energy audits, and identifying supplemental metering needs.

Decision:

The Health Facilities Advisory Committee (HFAC) reviewed and approved the final draft of the "Energy Management Program" dated April 9, 1997, subject to editorial revisions. The final chapter will be submitted for approval to the Director of the Division of Facilities and Environmental Engineering (DFEE). Effective immediately, this guide will apply to all new and existing IHS health care facilities and quarters.

Reference:

Copies of the final draft can be obtained from DFEE. The approved chapter will be issued as Chapter 72-2 Energy Management Program, Part 72, Volume VI of the Technical Handbook for Environmental Health and Engineering.

Adopted by HFAC on April 9, 1997.

Kenneth R. Harper, P.E.
Chairman, HFAC
